

A modern way of smell training whenever you want, wherever you are.

The scented nose plug in the NOSA smell training kit makes it possible to fulfill the training session when and where you want and can be seen as a modern alternative to traditional smell training. Roughly 20% of the world population has some type of smell impairment. NOSA smell training enables people to recover their sense of smell by association of scents.

NOSA smell training is a CE-marked smell training medical device and is designed to improve the treatment of patients with parosmia and hyposmia.

Scope

- 5 days a week
- 4 scented plugs per day
- 10 minutes smelling per scent
- 8 weeks in total

Contains

- 10 different scents
- 16 scented plugs of each scent

**Smell training whenever you want,
wherever you are.**
